

## PS Wall Panel Maintenance Guide

---

### **Routine Cleaning:**

- Dust and dirt can be easily removed using a dry microfiber cloth or a soft brush. For regular cleaning, use a damp cloth with warm water and a mild detergent. Avoid harsh cleaning products, as they may damage the finish.
- For deeper cleaning, use a non-abrasive cleaner designed for polystyrene surfaces. Gently scrub the surface with a soft sponge or cloth and rinse with water.

### **Preventive Care:**

#### Avoid Scratching:

- PS Wall Panels are lightweight but can be scratched if handled roughly. Use felt pads or rubber protectors under furniture or other objects that could scratch the surface.

#### UV Protection:

- PS Wall Panels are resistant to fading, but extended exposure to direct sunlight can cause discoloration. Where possible, minimize direct sunlight exposure, especially in high-traffic areas.

### **General Maintenance:**

- Inspect the panels periodically for any signs of wear or damage. If any panels become loose or detached, apply additional adhesive to reattach them.
- Check for any accumulated grime or grease in areas prone to splashes (e.g., kitchen or bathroom) and clean them immediately to prevent staining.
